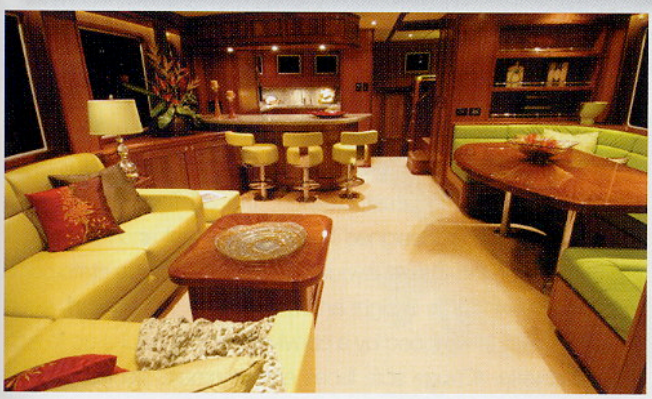
Nordhavn.com



As John Cleese would say, "And now for something completely different." Nordhavn turns the idea of extreme fishing machines on its head and elevates bluewater cruising to new dimensions with the ultimate mothership. No need to charter a sportfish off Ecuador to chase granders when you can get there in your own boat.

Long-range cruising champ Nordhavn has paired its conservative displacement hull approach with a yacht with real fishing chops, and burning just 12 to 15 gph at cruising speed, this one can go from California to Tahiti on a single fillup. To visit the air conditioned engine room on this boat is to fall in love with the elegance of logic and precision. Rather than clutter the space with redundancies, for most systems Nordhavn simply chooses the right gear for the job, keeping in mind the job is an endurance contest. The entire boat is built to ABS standards and ultra-demanding MCA qualification is attainable.

Hull #2 on display at the Palm Beach Show has been Awlgripped light blue and customized for a U.S. yachtsman who circumnavigated on a sailboat. His outfitting includes two tenders on the foredeck and a large curved table on the California deck overlooking the fish-ready cockpit plus additional outdoor dining/lounge options on the bridge deck and flybridge. There are three ensuite staterooms on the accommodation deck and a crew cabin aft of the wheelhouse.

R-80 Tournament Donzi By Roscioli

When Bob Roscioli sits down to create a luxury sportfisherman, you can bet there is no compromise between tournament performance and luxury cruising. Six hulls of this 80-foot semi-custom series have
