Second Nordhavn Rounds Horn

For the second time in four weeks a Nordhavn has successfully rounded Cape Horn, making the builder the first powerboat production manufacturer with two yachts to do so. Honors for the first Nordhavn to round the Horn went to *Egret*, owned by Scott and Mary Flanders; the second, *Ice Dancer* (above), owned by Dick and Gail Barnes. Jim Leishman, P.A.E. vice president, who was on *Egret*, predicts Cape Horn just might become a desired playground for long-range adventurers: "A fabulous cruising ground awaits those inclined and equipped with the right vessel," he says, leaving no doubt which boat that would be. Leishman also believes other great challenges are in store for Nordhavns: "This year Cape Horn; next year we'll see Nordhavns in Antarctica." *www.nordhavn.com*
